

Offshore Mediterranean Conference
Pala de Andrè - Ravenna 2019
27th of March 2019 from 14.30 to 16.00

Session Organized by Italian Ministry of Economic Development DGS- UNMIG

14.30 – 14.45 A Safe Transition through the innovation network for future energy – CLYPEA

F. Terlizzese – Director General for safety of mining and energy activities – Italian Ministry of Economic Development (DGS-UNMIG)

14.45 – 14.50 An introduction to the brand of CLYPEA

A. Di Gregorio – Professor at University of Milan “Bicocca” and Interuniversity Research Centre for Economy and Territory (CRIET)

14.50 – 14.55 Safety and environmental monitoring studies for Italian offshore activities

P. Macini – Professor at University of Bologna “Alma Mater Studiorum”, Department of Civil Environmental and Chemical Engineering (DICAM)

14.55 – 15.00 Eucentre Foundation – European Centre for training and Research in Seismic engineering: an overview on the activities

F. Germagnoli – Presidency and Management Operative Director (EUCENTRE)

15.00 - 15.05 Marine geohazards and hydrocarbon exploration & exploitation: from risk assessment to resource potential

M. Rovere – National Research Council, Marine Science Institute (ISMAR)

15.10 A physically based model for the intrinsically safe design of subsea accumulators

R. Cipollone – Professor of L’Aquila University at industrial Engineering, information and Economy Department (DIIIE)

15.15 Ground deformation analysis through spaceborne SAR interferometry and geophysical modelling

M. Manzo e G. Solaro - Researchers at National Research Council Institute for Electromagnetic Sensing of the Environment (IREA)

15.20 Microseismicity and safety

A. Morelli – Researcher at National Institute for Geophysics and Volcanology and Director of Monitoring subsoil Centre (CMS)

15.25 Methods and technologies for smart environmental monitoring and risk prevention in oil&gas platforms

F. Verga –Vice president for the internationalisation of Polytechnic of Turin and Professor at DIATI
